RADIO SPECTRUM: All broadcast spectrum is free to 10 private media corporations having approval of the national business council and receiving most media levy sponsorship or mobile Internet spectrum and fibre 1/10 bandwidth free to 10 telecommunications company connecting most {actual 25mbps+} broadband users.

Government may not sell or charge rent for spectrum. As set by the national parliament {Device transmitting under 100Milliwatt may use any spectrum without limit, restriction or cost, up to 10MHz per user allowing devices to switch to unused frequencies, Except may not use GPS, radar, navigation, emergency, and missile guidance spectrum up to 100mhz. Radio Quiet Zone: a radius of {} shall have no radio emissions except in emergencies for radio telescope.

*25khz from 0khz to 25khz military submarine communications.

*25khz from 25khz to 50khz positioning system.

*25khz from 50khz to 100khz over the horizon radar.

*400khz from 100khz to 500khz Point of sale automatic teller banking transaction and payment with encryption, (40channels x 10khz) Such as by satellite and by point to point tower. Traffic signal control, and satellite clock and wrist-watch time synchronisation signal. Automatic satellite and tower ship and aircraft location reporting and navigation information system and emergency locator beacon satellite. Remote smart meter reading, to use mobile phone spectrum where able.

*29.5mhz from 500khz to 30mhz; Multiuse as military shall require such as for drones then as local council shall configure and transmit configuration to ham transceiver visual channel labels on transceiver display and regulate maximum power and channel width (1khz to 20khz). With higher power channels at lower frequencies from 1watt to 300watts. Channels for data such as transceiver position and call sign and packet radio internet, Drones, Open business, emergency services and citizens bands push to talk open channels (not jammed or messed up with encrypted traffic noise).

*20mhz from 30mhz to 50mhz carrier point to point wireless dish

dynamic spectrum. For top 100 national backbone network provider carrier; for connection of low latency remote mobile device towers for mainly voice calls up to 5mbps speed cap to spread bandwidth to more users, so to use satellite dish for more latency tolerant wireless broadband. All of this spectrum is available to each of these carrier tower provider. Multiple user dynamic spectrum bandwidth channels, so fit as many users as each will get 5mbps. Carrier to use minimum required power per dynamic channel to provide good low latency voice connection by minimum power up to 100watts (Internet to use satellites as can tolerate longer latency).

*100mhz from 50mhz to 150mhz Open free {5G} cellular wi-fi dynamic spectrum (band 1) only for longest range connections up to 10mbps cap to spread bandwidth better to all users; Free open equal sharing of long range open spectrum wireless as required of standards set by the national parliament. Multiple user dynamic spectrum bandwidth channels, so fit as many users as each will get 5mbps with cap of 10mbps, With users to output just enough power for good voice connection of devices at more than 5mbps: Anyone may use and provide open spectrum wireless access using own backbone network connection and only for free. People may share open spectrum wireless passwords in exchange for roaming use of open spectrum wireless access. 1% of national budget for free open all areas hot-spots including Drones, lamp lamp posts, stadiums, schools, universities, hospitals, nursing homes, clinics, digital library charities, sports facilities, swimming pools, beaches, zoos, parks, conservation areas, tourist attractions, theatres, entertainment facilities, night clubs, shopping centres, malls, shops, restaurants, factories, city multi story buildings, churches, and community centres, Such as for owners, tenants, visitors, customers, workers, passengers, patients and students. Including for voip video phone calls. The free access point provider paying for routers, amplifier, antenna, and backbone network access such as by fibre. Devices do not have to use the same access method to receive and send access to network. Access point senders

able to have many users on each dynamic channel. Maximum power being minimum required to have good connection with maximum number of devices so able to provide 5mbps up to 100watts/channel. Wireless router to selection 3 last channels, then drop channel with lowest speed (most interference) and replace with channel for which having lowest signal level (not recently failed channels) for minimum interference. Also 2% of national budget for remote fibre backbone network with 10 {[Internet] standard as set by the national parliament} network fibres plus 10 cable TV fibres. With wireless towers for local connection for mobile phone and broadband. Each network fibre and each TV fibre for the network cable builder company from more than 10 having approval of the state parliament who lay most 20+ fibre backbone in the nation to charge only for fibre backbone network access (including for open wireless network access). So users able to change channels within 1 second. Tenant and property owners at the location may get free fibre network access and pay TV for allowing use of yard and roof for free wireless access services tower and antenna base station hub with eternal generator and battery, for the hub owner to provide open wireless network access to neighbours and visitors to pay just for fibre network access from own choice from the 10 fibre network builder. All users may live bid per megabyte for backbone fibre access for wireless with commercial satellite fall-back where available if wireless network access transfer rate has fallen a mega bits per second level set by the user. Devices must have automatic power control to transmit minimum required variable power output to only transmit minimum wireless signal power required by the user to connect and use device successfully. Peer to peer user and provider may also use point to point parabolic dish to collect and send signal with motor to auto focus such as to connect with neighbours. Also for free wireless open channel voice and peer to peer web tiles for services and people profiles in local proximity tiles subject to user filter for mobile phone and stationary vehicle. Maximum power minimum required to connect full screen of

tiles to 100watts. Sender user may set password to only sent tiles and open voice channel to people in proximity having the same password. Such as for sending personal emergency alerts. Also for Internet Of Things processing of data (may also use mobile phone/device spectrum): Smart tags, meters and sensors, Cordless phones, headphones and microphone, Remote control, Smart appliances, Traffic lights, signs and traffic alerts for vehicle AI, cameras, security sensors, speakers, home and industry equipment control systems, Toys, Vehicle to vehicle communications, Peer to peer browser showing tiles in order of proximity of devices self hosting. With and without passwords. Up to 500milliwatts/channel home devices, up to 5watts/channel outdoor device, up to 50watts/channel. Auto vacant channel switching.

*100mhz from 150mhz to 250mhz (100channels x 1mhz) for 100 {[DAB+] standard as set by the national parliament} satellite and tower digital radio stations including for backup. Each of stations for the private media corporations having approval of a member of the national parliament to receive most sponsorship from levy on sales for the income earners choice of private media corporation for free to air free commercials media. All English language. {1-World economics and policy article reading service. 2-recital of all 1764 combinations of the 42x42 letter phonetic alphabet brain exercise. 3-Christian and Jewish music radio. 4-Live national talk-back, 5-Crime, police, criminal law and trials radio. 6-emergency services: auto switch with manual over-ride to broadcast emergency services control centre where having most communications. 7-Weather radio. 8-Off grid living article reading service. 9-Natural cycles and prophecy. 10-Environmental radio. 11-Secrets disclosure and conspiracy. 12-Pets and animal welfare radio. 13-Nutritional medicine article reading radio. 14-Exercise and fitness radio. 15-Celebrity gossip radio. 16-Product review radio (selection not for payment of money). 17-Science and technology article reading service. 18-Shopping (paid advertisements) radio. 19-Criminal law and courts radio. 20-Fair

*3ghz from 500mhz to 3.5ghz for (300 channels x 10mhz with spectrum at 2.45ghz for microwave oven); Free open less than 1millisecond latency {5G} cellular wi-fi (band 2) mobile device dynamic spectrum. Selection of 4-10 last channels to requirements, then dropping of channel with lowest speed (most interference) and replacement with channel having lowest signal strength for minimum

interference) for ground tower, lamp posts, and on roof wireless Internet. {[5G using Artemis pCell pre processing signal focusing technology] standard as set by the national parliament} [With 100 pCell (devices) per 10 pWave (antenna) cell using just 5mhz: 3ghz would provide much more network capacity than we all could possibly use so we might as well use extra surplus spectrum for additional uses] To user own choice of any backbone network provider such as a neighbour with optical fibre. The user and provider may have a billing system, With use device able to switch instantly to backbone network provider with cheapest backbone network rates including optical fibre and satellite. Multiple small cell local wireless micro-node signal boxes (such as in secure safe off road cabinet on royal estate national socialist housing land, so not going to be hit by a car) also for drones, hilltop towers and satellite. For mobile devices with internal antenna 10 centimetres or less in length with local cell maximum power 20watts/channel, with drones, hilltop towers and satellites maximum power 100watts/channel. *Spectrum at 1.57542ghz and 1.2276ghz for global positioning system. *500mhz from 3.5ghz to 4ghz high power radar spectrum. *6ghz spectrum from 4ghz to 10ghz for satellite up-links spectrum in proportion to down-link spectrum allocation. *20ghz spectrum from 10ghz to 30ghz. Radar. *50ghz spectrum from 30ghz to 80ghz free open radar spectrum for vehicle such as for taxi and drone auto pilot self navigation mapping. To 10watts emitter. Subject to local council restrictions. *20ghz spectrum from 80ghz to 100ghz Free open use spectrum such as for spectrum hopping wireless local wireless device to screen video, data and audio links subject to local council and federal minister restrictions. Up to 100mhz per user device. To 10watts emitter. *Spectrum over 100ghz for radio telescopes.

(xiv)Border protection, Customs, Police, Customs, Courts and Prisons within lands and territorial waters of own Commonwealth nation.

Expulsion of invader. Aid to other nations to resettle blacks including refugees. Each of the 10 main plus 10 state private telecommunications network builder companies having approval of the state business council to build the network shall also have free reasonable use and connection to of each others ducts, poles, exchange router (which shall have ports to plug in cables of all network builders) and data centres to extend the network. Any user may access any wireless node using SIM from own choice of billing provider for the user to bid a price per megabyte for a portion of wireless bandwidth (speed) in proportion to bid as a proportion to all bids for the provider, device and user may use multiple provider and instantly adjust choices from the 10 providers live and dynamically to get best speeds. Device/user using both

mobile and satellite bandwidth must bid for both. The SIM account holder paying any amount the sims billing system provider credits in advance in any of the 10 main world currencies to never expire until used. The network builders may use any vacant land to lay ducts and place poles and towers as is required, where giving to property user (renter) access to the network, with only the ducts and contents being the property of the English Language Commonwealth Empire nation. Automatic top-up of prepayment to billing provider accounts after using up 90% of last prepayments, with live display of prepayment amounts. Billing providers to pay network builders at end of each month. User/device account holders credits if used up prepayments shall retain connection to billing provider, taxi and emergency services and phone calls on credit for 1+ year. Device shall have free secure exchange of {Wi-Fi} passwords so as when allowing access to own {Wi-Fi}; shall get roaming proportional roaming {Wi-Fi} in return;

(xvi) Levy on income for earners who are home owners for the earners own choice of free unregulated charities having local council accreditation 4% levy for Health, emergency or disability services charities, 4% for additional charities such as for free software, environmental, prisons, fertility,,; services both types from 100 charities a local council in the state will accredit, and 2% levy on home owners income for the earner to allocate to own choice from the 100 biggest media organisations by viewer hours each month in the English language Commonwealth Empire nation.
